12,120 tons, respectively; and of railroad iron 8,735 tone,
97 tons and 7,141 tone, respectively. Of cutlery the
value only is recorded, £6,177, £6,196, £27,465, in November of the three years respectively; and of Britannia
metal and other hardwares, £45,590, £14,955, £70,332.
The export of steel manufactures does not show so
remarkable an advance. Of haberdashery our
November export to the States in the last three
years has been of the value of £72,965, £11,232,
and £114,945, respectively. Up to the end of October
the exports of our produce and manufactures to the
United States in 1865 had reached only to the value of
£14,844,704, which was a smaller amount than in the
corresponding period of 1864; but the November exports
have made the difference for the eleven menths to be
largely on the other side. Of raw cotton we imported
from the United States 46,201 cwt, in the first eleven
months of 1863, 119,095 cwt, in the corresponding period
of 1864, 433,773 cwt, in that of 1865—even the last an
insignificant quantity compared with the years before
the war. The great decrease of our import of grain from
America this year has been recently mentioned.
